(54) POWER LINE ADAPTER

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a power line adapter to be used at the time of performing power-line carrier communication capable of easily being connected to equipment while enhancing communication reliably.

SOLUTION: This power line adapter is provided with a function for branching a supplied power by branch lines 5 and a branch plug 4, and connected between the power input part of electric equipment and a power cord to be connected to the power input part. In this case, the power input part side is provided with a plug socket 3 shaped connectable to the power input part, and the power code side is provided with a plug tap blade 2 shaped so that a power code can be made connectable.
